Dear FCC Chairman:I would appreciate you allowing Satellite Radio to continue there Instant Traffic and Weather.

I appreciate this service because instead of waiting several minutes on AM/FM radio, I can receive this information almost immediately. It's very unfair for public radio to deny this service because it's offered on free radio.

Wasn't there a problem with Satellite TV in which free channels weren't permitted and now they are. Isn't this the same situation that's already been resolved. Free Radio and TV should not be allowed to interfere with free enterprise. They should compete and not restrict.

Thank you for your consideration of this problem, and I trust you will do the right thing and permit free enterprise.
